

# MONTE TONDO

**History** - Nestled in the hills of Soave lies Monte Tondo, a winery that has been passed down through three generations. In 1979, Aldo Magnabosco purchased an incredible 25-hectare property in the Soave Classico region. Today, Gino Magnabosco along with his daughter Marta carry on the family tradition always trying to showcase the quality of grapes that come from this highly prized vineyard.

**Estate** - The estate in Soave is just a few kilometers from Verona, on a slope overlooking the valley. The estate is uniquely situated 150 meters high, which is high for the region. The vineyards are 80-100 years old with a quarter of the vines on their original rootstock. The soils range from volcanic tuff to chalk to clay and limestone. The different soils contribute greatly to the wines acidity, minerality and ageability.
